

DataStar

DataStar is a global data consolidation and on-line travel management reporting solution for global

DataStar provides you with comprehensive travel financial data

corporate customers.

It was developed for GlobalStar by the travel industry's leading providers of data consolidation technology.

Our DataStar technology will be deployed to securely collect, consolidate and normalize currency to provide comprehensive travel financial data from all of GlobalStar's international locations.

Client benefits include but are not limited to:

- The ability to book through several GlobalStar agencies and still report on their global data.
- The opportunity to manage their travel with regard to security, spend, compliance, and policy using reports available through the DataStar program.
- Access to the industry's best reporting suite and data collection.
- Internet based reporting, access to data 24/7/365 days a year.
- Interactive reports to pdf, Excel, Excel designer, OLAP, Cube, Dashboard.
- Ability to report in any currency and language around the world.
- Better quality of data.
